

PfH is dedicated to helping the social housing sector achieve compliance and control over spend. We have saved Members up to 27% on purchasing costs. The consortium generates substantial savings by harnessing the collective purchasing power of over **730 housing organisations**.

By reducing procurement costs and generating process efficiencies, organisations can reinvest resources back into communities.

Your national procurement consortium delivers:

- an expanding portfolio of new and improved EU compliant agreements which reflect the social, environmental and economic needs of Members;
- professional contract management and advice from the sector experts;
- an e-procurement solution, the PfH Marketplace;
- extensive management information and ease of invoicing through Central Billing; and
- a regular programme of events and seminars.

“The PfH team provides a fantastic level of support to ensure that arrangements are set up correctly initially and then that the agreements and suppliers continue to meet our expectations”.

Mike Wiffen,
Barnet Homes.
